

## From the Gardening Team

For several weeks now, we have been on a mission to restock the rose bed adjacent to the halls entrance. The older plants have been removed and the bed has been dug over, fertilized and made ready for the delivery of replacement bushes, which is due in the next few weeks.

We have been extremely fortunate to receive help with the purchase of the plants from several groups and individuals, for which we are very grateful, and we wish to thank everyone for their kindness.

However, we are still some little way short of the amount which would allow us to cover the full purchase price. If anyone feels that they would wish to make some contribution to help us attain our target, we will be very grateful.

Tom and Alan
